

HOME IMPROVEMENT MONTH  
WITH *demista*<sup>TM</sup> AND Cosyfloor<sup>TM</sup>

April is Home Improvement Month and with Easter falling early in 2012, traditionally a busy time for DIY stores and garden centres, this is when the cobwebs are dusted off and serious thought is given to fixing, adding to or upgrading house or garden.

Bathrooms and kitchens are often the first two rooms needing a facelift, whether it be new tiles, flooring, bathroom fittings or just a change of décor. So what better time to consider installing underfloor heating or, in the case of the bath or shower room, heated mirror pads to ensure a clear and steam free view all the time?

COSYFLOOR CABLE MAT

MIST FREE MIRRORS & WARM FLOORS

Under floor heating may appear a very modern and expensive idea, but it should be remembered that the Romans introduced this type of heating to their homes in Britain around 2,000 years ago. The various systems, *Cosyfloor*<sup>™</sup>, *Ecofloor*<sup>™</sup> and *Ecomat*<sup>™</sup> can all be obtained from R & D *demista*<sup>™</sup>. *Cosyfloor*<sup>™</sup> is designed to warm surfaces such as tiles, marble, and stone. *Ecofloor*<sup>™</sup> is a cable kit that fits beneath most floor surfaces and adapts to irregular shaped rooms and *Ecomat*<sup>™</sup> is designed to silently warm floor surfaces made of laminate or wood.

The ranges designed for the bathroom and kitchen areas, where water can be splashed or spilt, are perfectly safe to use as the cables are earthed.

*demista*<sup>™</sup> heated mirror pads are sold worldwide, for homes and apartments, both new developments and refurbishments, as well as to many of the well known large international hotel groups and luxury independent establishments. These easy to install pads are available in a variety of sizes, and can also be used in multiples or custom-made to cover very large mirrored areas.

**Prices for the underfloor heating start at: £ 22.50 per square metre.**

**Prices for the heated mirror pads start at £ 18.65 for a Pad 274 x 150mm**
