

## MAKING UP – TOGETHER

WITH *demista*™

Sharing a bathroom can at times be less than comfortable, but one way to reduce any tension is to ensure you leave your bathroom mirror steam free for your partner. Whether showering or taking a bath, steam clouds up mirrors. By fitting *demista*™ heated mirror pads this problem is easily solved.

These pads are simple to install, are available in a variety of sizes so will fit any mirror, and can be used in multiples for extra large surfaces.

The pads are manufactured in the United Kingdom and have proven quality after 20 years in the market world wide. *demista*<sup>™</sup> is the innovator of steam free mirrors and the first heated mirror pads sold in the UK.

Prices start at £28.50 per pad.
